

CITY OF DREAMS

LEARNING OBJECTIVES-

1. To practice creating the illusion of 3D space using accurate two-point perspective
2. To expand our imagination by combining objects or ideas that do not make rational sense

STEP BY STEP DIRECTIONS:

Your city must include at least:

- 3 buildings
 - 3 appliances
 - 1 object above eye level, 1 below eye level, and one at eye level.
 - 1 hill or mountain on the horizon line
1. Begin by drawing a few cubes in two point perspective. (Use the “Drawing two-point perspective” handout). To be considered complete, your city must include at least 3 buildings.
 2. Add windows, doors, signs, balconies, etc. to your buildings.
 3. Add some streets, curbs, sidewalks, anything that will help your group of buildings look like a city.
 4. Draw in your appliances using two-point perspective (refrigerator, microwave, washing machine, etc.)
 5. Make sure your name is written on the back along with your period number and turn it in.
